Design Variations
Symbols are supported in up to nine weights and three scales.
For optimal layout with text and other symbols, vertically align symbols with the adjacent text.

|A|
Margins
Leading and trailing margins on the left and right side of each symbol can be adjusted by modifying the x-location of the margin guidelines. Modifications are automatically applied proportionally to all scales and weights.

🔧
Exporting
Symbols should be outlined when exporting to ensure the design is preserved when submitting to Xcode.

Template v.6.0
Requires Xcode 16 or greater
